# Theatres at Risk Register

# Assessment of Risk

### There are 35 buildings on this year's Theatres at Risk Register.

As in previous years theatres at risk are assessed on 3 criteria - Building Risk; Star Rating; and Community Value, definitions of which are given below. Every building is given a score between 0 and 3 in each category. These scores are then added together to give a total Risk Value. The maximum score is 9 and the minimum to ensure inclusion on the list is 4.

This year we have reassessed the Community Value category to include the viability of the building as a performance venue. The definition of Community Value is explained below.

We have also weighted the categories slightly differently this year: where the total risk score for theatres is the same, the Community Value, which includes the viability of the venue, takes precedence. This is followed by the Star Rating and then the Risk Rating. Lastly, if all criteria scores are equal, the buildings are listed alphabetically.

#### **Definitions of Risk Criteria**

**Building Risk:** theatres are assessed and given a 'Building Risk' rating of 1 - 3 dependent on whether the risk to the building is perceived as low (1 point), medium (2 points) or high (3 points).

Risk criteria in this category includes the following:

- Demolition
- Alteration to another use, particularly when this involves a change of Use Class
- Local development adversely affecting theatre operation or restricting expansion / improvement
- Threat through sale or change of ownership
- Threat to building fabric, e.g. decay of a building not in use or the removal of significant features
- Threat to building fabric, i.e. irreversible works which may prevent a return to theatre use, or damage to (or removal of) specifically theatrical materials
- Capital or revenue concerns
- Poor quality of building operation threatening the continuing or future theatre use of the building

- Other external issues affecting theatre operation
- High cost of maintenance / refurbishment works

**Star Rating:** this is a qualitative judgement on the importance of the theatrical qualities of a theatre. This includes a building's architectural quality, workability as a theatre, heritage, and geographical uniqueness. Points are awarded from 1 – 3. A theatre must score at least 1 point to be on the register.

- **3 points** are awarded where it is a very fine theatre, of the highest theatrical quality.
- **2 points** are given to a fine theatre which is an excellent example of its type.
- **1 point** is given to a theatre which is of some interest or quality.
- **O points** are applied to a building which is of lesser interest, half complete, irretrievably altered, or a complete but unremarkable theatre

Community Value: this establishes the community demand for the retention and protection of a theatre. Importantly this category now includes the viability of the building as a performance venue. Points are awarded between 0 – 3 and are allocated as follows:

- **3 points** are awarded where there is clear community demand and viability for the building to be used as a theatre.
- **2 points** are given to a theatre where there is a possibility and demand for returning the building to performance use this could include community performances / music.
- **1 point** is awarded to a theatre where there is potential for the building to be brought into use as a community facility with no / minimal community performance.
- **O points** are applied to a building which would have a future in uses other than as a live performance or community venue.

## Theatres at Risk Register 2018
